- Replaced gas pressure relief/flame arrestor assembly on #1 Digester.

Safety

- Staff attended a safety meeting on replacement motor at FFR.

Training

- All operations staff are undergoing a two week training/familiarization tour in the lab.

The sludge conveyor has been delivered to the Plant. The District Engineer is designing a support system for the conveyor.

We are awaiting delivery of the new boiler.

The SCADA cabinet has been installed and partially wired.

Staff has discontinued the use of polymer in the primary clarifier. Polymer was used to enhance the settling of suspended solids in the clarifier.

Plant operations continue to run smoothly to this point. Staff continues to develop a solid maintenance program.
