MEMORANDUM

Date:

January 9, 2012

To:

SSLOCSD BOD

From:

John Wallace - District Administrator/District Engineer

Subject:

Summary of December Professional Services; December 2011

To provide addition information to the Board specific to the professional services completed under the new bifurcated contracts we have prepared this monthly memo. Additional detail can be found on the enclosed invoices. Costs accrued to date and status against the budget for Administrative and Engineering Services are broken down on the attached Breakout of Wallace Group Expenditures.

District Administrative Services

- Administration
 - Preparation of Board packets and meeting minutes and post on website
 - Board meeting attendance
 - Staff meeting attendance
 - Coordination with district counsel on personnel issues
 - Bi-monthly budget tracking and project status update
 - Revisions to Resolution 2011-295
 - CalWarn Mutual Aid Agreement enrollment
 - Develop requirements for establishing a joint mutual aid agreement between member agencies and district
 - IRWM Recycled Water Grant application package preparation

District Operations Project

- Sewer/Collection System
 - Coordinate with District staff on Sewer Use Ordinance update requirements, SSMP, and Communication Plan/FOG Resolution
 - Prepare sewer flow surcharge calculations to be utilized during trunk system plugging and cleaning
 - Coordinate sewer cleaning (annual hotspot cleaning)
 - Preventative maintenance plan preparation per 2006 WDR Order and SSMP requirements
- Brine Disposal
 - Meeting with District staff to review current brine state and Kennedy Jenks status
- Zone 1-1A Coordination
 - Zone 1-1A meeting attendance
- Rate Study
 - Staff report preparation on rate analysis outcome and steps for reconciliation
 - Billing information review from member agencies
- Pretreatment Program
 - Coordination with Monarch Winery and wastewater calculations for land disposal options

www.wailacegroup.us

- Review and comment of Industrial Wastewater Permit Application for Monarch Winery
- RFP preparation for Pretreatment Ordinance Update
- Pretreatment and industrial use applications follow up of various users
- Grease Control Program
 - Staff report, resolution, and public information letter preparation for FOG Ordinance
 - Revisions to Resolution 2011-295 per District Counsel comments
- WDR & SSMP District Expense
 - Review status of and newsletter article for communication plan
 - Coordinate first annual SSMP presentation to Board
 - Review FOG Fee staff report
 - SSO flyers and SSO response inventory
 - Influent characterization study preparation
 - Review annual SMR data
 - Coordinate link to SSLOCSD website from member agency's website
- Air-Water Board Permit Requirements
 - Coordinate with District staff on NPDES annual monitoring data and timeframe for 2011 Annual Report
 - Reviewed MMP status and CIWQS
 - Reviewed monthly eSMR and reviewed data for the Annual SMR
- SWRCB SSO NOV Response
 - Preparation of Influent Characterization Study as requested by SWRCB
 - Research other agencies sewage spill response for monitoring and conducting short and long term ecological impact studies
 - Spill volume engineering assessment, estimates, and methodology
 - Preparation, attendance and follow-up to SWRCB meeting in Sacramento
 - Research SSOs in California and associated fines
 - Plot monthly Oceano Lagoon total and fecal coliform water monitoring results for 2011 and asses for trends
- Wastewater Systems
 - District staff meeting attendance and follow-up
 - Preparation, attendance and follow-up to Collection System Coordinating meetings
 - Member agency GIS map updates
 - Strantrol data analysis
 - Plant chemical costs, historical BOD numbers
 - IT and JWCE contracts coordination
 - Meeting with TelStar regarding water testing and SCADA implementation
 - Plant tour guide for member agencies collection staff
 - Influent pumping (11 MBI 08)

District Reimbursable Projects

- FOG Inspections/Re-inspections
 - Coordinate and schedule next set of FOG inspections
 - Completed FOG inspections and re-inspections at various food establishments and AG Hospital
 - Updated database with completed FOG inspections
 - Prepared end of the month FOG reports
 - Processed permit applications and renewals

Major Budget Items (MBI) Projects

- New Centifuge (05 MBI 06)
 - Project budget closeout and reconciliation with District records
 - Record drawings preparation
- Primary Clarifier No. 1 (06 MBI 04)
 - Research new drive versus re-built drive
 - New drive purchase order
- Influent Pumps Gate-Check Valves (06 MBI 13)
 - Project management, element scheduling, and preparation of project design specifications
- O&M Manual & Associated Training (10 MBI 11)
 - Reviewed Chapters 6, 7 and 8 in preparation of training at plant.
 - Reviewed Chapter 3 with operations staff
 - Began update of Chapter 5, Personnel

Response to 2011/2012 audit by Moss, Levy & Hartzheim

Staff appreciates all your hard work performing the audit of South San Luis Obispo County Sanitation District's financial statements. In your audit, you discussed several significant deficiencies that you noted as Findings 2011-1 through 2011-5.

We would like to respond to each and every one of your findings, describing our corrections and actions, and would request that you revise your findings accordingly.

Finding 2011-1: Payroll Transactions

Finding: During the testing of the payroll system, it was noted that in five of the employees tested, personnel action forms were outdated. In one instance, the employee was promoted or reclassified, but the personnel action form was not updated to note the changes in compensation and benefits.

Recommendation: It is recommended that the District should complete and retain in the personnel files, a personnel action form stating approved pay rate, stipend, job description, accounting coding, and allocation. All personnel action forms should be signed by both, the District's designated representative and the employee. The personnel action form should be updated for each change to an employee's payroll information to ensure that the employee's pay, job classification, and account allocation is appropriate.

District's Response: The District agrees with your recommendation and has implemented the recommended changes. The District staff has updated each employee file to include a current employee personnel action form that states the approved pay rate, stipend, job description, account coding and allocation. The action forms are signed by the employee and a District representative, either the Plant Superintendent or the District Administrator. Each employee has received and acknowledged a copy of the District's Personnel Manual which includes job descriptions for all positions.

Future Actions: Upon each change to an employee's position, a new personnel action form will be completed and signed by both the District designated representative and the employee.

Finding 2011-2: Vacation Accruals

Finding: During testing of the payroll system, it was noted that in fourteen out of the twenty-five transactions tested, employees were accruing vacation at incorrect rates. The District implements a dual-system to determine hours worked during the period. Employees clock in and out in a computer system to keep track of hours worked. Employees also note the hours worked each day in a log book, where tasks performed are tracked. The computer system generates the type of hours worked and used, such as regular time, overtime, sick hours, vacation, etc., but these hours did not always match the hours recorded in the log book. Reconciliations were prepared by the bookkeeper to

determine the hours worked, vacation and sick time used. Management oversight was not present as neither the time sheets generated by the computer system nor the log was approved by anyone. Furthermore, it was noted that the final payroll register was not approved either.

Recommendation: The District should design and implement internal control procedures to ensure that the employees are compensated for the correct type of hours worked and vacation and sick time are adjusted accordingly. The computer time management system should be used strictly to record the hours worked per day. Timesheets should be signed by employees to certify as to their accuracy. Furthermore, timesheets should be approved by a designated employee to avoid payroll errors that may go undetected.

District Response: With the hiring of a new bookkeeper and plant superintendent, the District has implemented a new sign in procedure which involves a new timesheet (please see attached). Each individual employee fills out his/her start and stop time, hours of regular work, different leave types and overtime. The District Bookkeeper, along with the employee, tracks his/her vacation accrual rate. The employee signs the timesheet and his/her supervisor or the Plant Superintendent will counter-sign, approving the timesheet. The computer system will provide back-up documentation of the hours worked.

The District Bookkeeper has reviewed the vacation accrual rates of all employees and has adjusted all where warranted. Any discrepancies of leave will be credited and the employee will be compensated accordingly. The employees' paychecks also include vacation and sick leave accumulations and hours used for the employees' own records. Any discrepancies are to be addressed within the next pay period.

Future Actions: Employees clock in and out via the computer system and, in addition, fill out their timesheets which coincide with the payroll periods. At the end of each payroll period, the District Bookkeeper will compare the employees' timesheets to the entries made in the computer and reconcile any discrepancies and notify the employees of any issues. The District Bookkeeper will verify that the employees are compensated for the correct type of hours worked and that leave time hours are accrued accordingly.

Finding 2011-3: Cash Reconciliation

Finding: During our testing of cash balances, it was noted that although cash reconciliations were performed, the District's general ledger balances did not reconciled with the County's cash balance.

Recommendation: The District should conduct monthly cash reconciliations between cash held with the County balances and the District's general ledger. Any variance between the two should be examined and corrected in a timely manner.

District Response: The District has corrected this issue, and the District's balances reconcile with the County's balances on a monthly basis. Any discrepancy is reconciled and noted and reported to the District Board in the Monthly Financial Review.

Future Actions: Each month, the District Bookkeeper will acquire a Fund Detail Report from the County and compare it to the District's Cash ledger. The bookkeeper will adjust the District's ledgers where warranted (e.g. staled and cancelled items by the County) and keep a log of outstanding items that make up the difference between the District and County account balances. Outstanding items that remain on the log for more than 3 months shall be examined and corrected in both the County and the District ledgers.

Finding 2011-4: Connection Fees

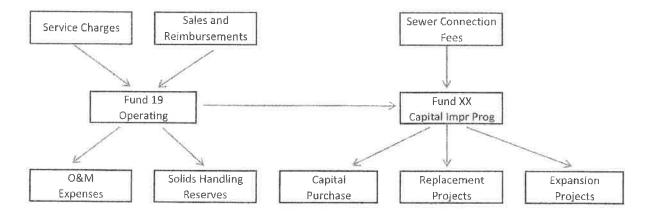

Finding: During our analysis of the general ledger, it was noted that the connection fees received by the District were used for general operations. Connection fees are restricted for capital expansion project purposes only.

Recommendation: It is recommended that the District should not use funds restricted for capital expansion projects on the general plant operations. In addition, the District should set up "due to/due from" accounts between funds for internal accounting records to better record the District's financial status.

District Response: The District will consider the recommendations and act accordingly. The District maintains separate account tracking and balances for each of its three funds at each of the facilities where the funds are deposited. The account balances as of 05-31-12 were:

	Fund 19 Operating	Fund 26 Replace/Improve	Fund 20 Expansion	District-Wide
Cash w/County	3,599,454	-1,740,428	-1,434,777	424,249
Cash w/LAIF	-4,341,041	2,107,157	5,731,252	3,497,368
Cash w/Rabobank	45,447	-1,730	0	43,717
Total	-696,140	364,999	4,296,475	3,965,334

<u>Future Actions:</u> In the future, to eliminate Expansion Fund (20) revenue being used for general plant operations and Operating Fund (19) used for expansion capital activities, it is recommended that the District employ just two funds: An Operating Fund (19) and a Capital Improvement Program Fund (XX). This would separate general plant operations from capital projects. It is envisioned that the Funds would be established as follows:

As operating funds may have been used in the past for expansion purposes with the current funds setup, it is feasible that the proposed Funds could be established along the lines as follows (assuming a start date of 6-30-12):

	Fund 19	Fund XX	
	Operating *	Capital Impr Prog	District-Wide
Cash w/County	1,859,026	-1,434,777	424,249
Cash w/LAIF	-1,902,743	5,400,111	3,497,368
Cash w/Rabobank	43,717	0	43,717
Total	0	3,965,334	3,965,334

^{*} Fund 26 funds transferred back to Fund 19 plus \$331,141 from Expansion Fund 20

Finding 2011-5: Receipts

Finding: During our examination of the internal control structure regarding receipt of funds, it was noted that there was a clear lack of segregation of duties.

Recommendation: It is recommended that the District segregate the receipt, recording and deposits of funds. It is noted that the District is on the smaller side and that the strengthening of internal control procedures would require additional staff.

District Response: The District recognizes that it is a small organization with only one bookkeeper, but the District believes that it has mitigated this issue by using the County as a depository and by reconciling both sets of books on a monthly basis. Furthermore, whenever the District Bookkeeper receives funds, which are mostly in the form of checks, another staff member enters the funds in a "Funds Received" logbook. In the logbook, supervisory staff records the check number, from whom, the amount and who recorded the funds. If the funds should be cash, it would be noted also. The funds will then be turned over to the District Bookkeeper for completing the deposit process.

Future Actions: The segregation of functions has been revised as follows: The District Bookkeeper picks up the mail, separates the items most likely containing any funds and gives those items to the Plant Superintendent to record in the logbook. If he is not available, the funds will be recorded by the next senior operator. The staff member records the funds into the logbook and returns the items to the District Bookkeeper. The Bookkeeper logs the funds into the accounting system and delivers the items to the County for deposit.

We hope that the items above satisfy the items identified through the District's audit process. Should you have any questions, please do not hesitate to call Matt Haber, District Bookkeeper/Secretary, at 481-6903 or me at 544-4011.

Yours truly,

John L. Wallace, District Administrator
